high cost of living had a tendency to unsettle the goods market and continued nervousness over labor conditions, combined to promote further selling of catton today. First prices were 24 to 35 points lower, but Liverpool was relatively steady and there was a good deal of trade buying here on the lasts of 31.00c for October. This with the unexpectedly favorable showing of the report on domestic mill consumption for July, steaded the market after the call and led to railles of 30 to 40 points.

after the call and led to railies of 30 to 40 points.

The rally from the first sharp break met heavy general selling and stop orders were uncovered in the first hour with October selling down to 30.89c and January to 30.52c, or 42 to 52 points net lower. There was enough buying to check the decline at this level and prices showed railies of 30 to 40 points around midday.
